Dear Colleagues,

The first board meeting in 2018 took place in the beautiful city Bruges (B).

We welcome Vida Bračko to the board. She works in the surgical part of the ED in a hospital in Ljubljana. She is the president of the Slovenian ED-nursing association. Vida will present her local association in this newsletter.

Networking
Ole-Petter Vinjevoll has been to Poland and had a talk. Yves Maule was at the conference with ESTES and they wanted to have a nursing track also in 2019 in Oslo. They wanted our help to attract speakers.

New members
An increase of 10 individual members could be reported in 2017, which makes in total 29 members.

EUSEM meeting in Glasgow
Door Lauwaert is member of the organizing committee. Christien Van Der Linden and Jochen Bergs are member of the scientific committee.
In this newsletter you will find the program of the nursing track.

Nursing and trauma conference in Netherlands
The EuSEN General assembly will be on Friday the 5th of October at lunchtime from 12h45-13h45. We will also get a lunchbox for this meeting.

Shadowing program
Two Belgium nurses attended the shadowing program in the Netherlands. They visited the hospital The Haaglanden Medical Center Westeinde, The Hague (NL). EuSEN supports and facilitates all nurses from Europe who are interested in visiting ED’s in other countries.

Scientific advisory committee (SAC)
The SAC has been strongly involved in the organisation of the nursing track for the EUSEM-conference in Glasgow.

Survey on burnout ER nurses
The Belgium Society (FR) for Emergency Nursing (AFIU) started to look into ED-nurses and burnout. More than 30% of nurses took medications because of their busy work and workload. They sent out a survey with 22 anonymous questions. They received 382 useful answers. The analyses showed that the results are alarming, and they have to do something to change this. It would be interesting to send this survey to other countries within Europe. The survey will be soon available on EuSEN’s website, so please contribute.

Child maltreatment survey
EuSEN and EUSEM support The Augeo Foundation (NL) on a survey of early detection of child maltreatment in the Emergency Department. This work will be finalised by the end of the year. The survey will be distributed to the member associations to take part.

EuSEN conference in 2019
On May 24th 2019 EuSEN will organise an emergency nursing congress, nearby Brussels. Further information will be given as soon as it is available.

Strategic plans
More news about this item further in this newsletter.

ESNO meeting
ESNO want a EuSEN representative in the educational committee. Thordis Thorsteinsdottir from Iceland was nominated to represent EuSEN on it behalf. Yves Maule will take EuSEN’s seat for all other ESNO matters.

On behalf of the EuSEN Board

Door Lauwaert
President

www.eusen.org
The president or a representative of the board (who is entitled to make decisions) of the EuSEN’s member organizations have recently received an invitation to attend the next General Assembly (GA) which will be held on October 5th, 2018 in Noordwijk, The Netherlands, at the 3rd Global Conference of Emergency and Trauma Nursing (https://www.elsevier.com/events/conferences/global-conference-on-emergency-nursing-and-trauma-care).

A lunch will be provided during the meeting.

During the GA we would like to discuss with the associations’ representatives, EuSEN’s main purposes and goals for the next 5 years. A strategic plan including the EuSEN Mission Statement will be produced. We count on the different opinions and suggestions as well as we depend on the input on these important matters which are groundbreaking for the future of EuSEN.

---

**Interdisciplinary work**

The Swiss emergency nursing association was interested to learn how ED-nursing associations in other countries work together with the emergency physician associations and if there is a collaboration.

The Netherlands:

The collaboration is getting better, but it is still not optimal. They have done some work together. The collaboration was always on the nurse initiative. There is no interdisciplinary meeting point.

Belgium:

There exists a national council on Urgent Medical Aid with physicians, nurses, EMT’s and representatives of the fire brigades and the call-centers to give advices on the minister of health. The same structure exists also on the local level.

Norway:

No collaboration between emergency nursing and physician organisations.

Iceland:

The Emergency physicians and the nurses try to organise yearly a common conference. It’s a small conference, and they should do more work in the future.

Slovenia:

They have one joined conference with Emergency physicians and Emergency nurses. The is no existing meeting point on a national level.
Trauma and Disaster
Moderators: Frans DE VOEGHT (THE NETHERLANDS), Damir VAZANIC (PRESIDENT) (Zagreb, CROATIA)

- 09:10 - 10:40 Performance of a trauma team activation tool. Ole-Petter VINJEVOLL (Trondheim, NORWAY)
- 09:10 - 10:40 Two mass casualty incidences involving tourists in Iceland: preparedness of the emergency department at Landspitali National University Hospital. Gudrun Lísbet NÍELSDÓTTIR (Project manager, emergency planning) (Reykjavík, ICELAND)
- 09:10 - 10:40 Solutions to the biggest inhospital disaster - emergency department crowding. Christien VAN DER LINDEN (THE NETHERLANDS)

Geriatric Emergency nursing Care
Moderators: Gudrun Lísbet NÍELSDÓTTIR (Project manager, emergency planning) (Reykjavík, ICELAND), Ole-Petter VINJEVOLL (Trondheim, NORWAY)

- 11:10 - 12:40 Geriatric Emergency Nurse: connecting emergency care with the community. Ingibjörg SIGURSÓRSSDÓTTIR (ICELAND)
- 11:10 - 12:40 Negotiation of teamwork: How nurses and physicians as a team consider their ESI-based triage level in older ED patients: an Interpretive description. Thomas DREHER-HUMMEL (Nurse) (Basel, SWITZERLAND)
- 11:10 - 12:40 Elderly care in Croatian rural hospital Emergency Department. Valentina KOVACEK (Molve, CROATIA)

Well-being of staff
Moderators: Valentina KOVACEK (Molve, CROATIA), Ingibjörg SIGURSÓRSÓTTIR (ICELAND)

- 14:10 - 15:40 Prevalence study of burn-out in Belgium emergency departments, key recommendations. Yves MAULE (MANAGER DE SOINS) (LIEGE, BELGIUM)
- 14:10 - 15:40 Implementation of electronic competence assessment program for emergency nurses – improved goal setting and job satisfaction. Dóra BJÖRNSDÓTTIR (ICELAND)
- 14:10 - 15:40 Team Wellbeing in ED Design. Una CRONIN (Clinical Research) (Limerick, IRELAND)

Emergency Nursing research
Moderators: Una CRONIN (Clinical Research) (Limerick, IRELAND), Yves MAULE (MANAGER DE SOINS) (LIEGE, BELGIUM)

- 16:10 - 17:40 Hot topics in emergency nursing research. Jochen BERGS (Post-doctoral researcher) (Hasselt, BELGIUM)
- 16:10 - 17:40 Transforming psychiatric care delivery in the emergency department: one hospital’s journey. Frans DE VOEGHT (THE NETHERLANDS)
- 16:10 - 17:40 Out-of-hospital cardiac arrest outcomes in Croatian Emergency Medicine Service. Damir VAZANIC (PRESIDENT) (Zagreb, CROATIA)
Presentation of SMSIZTU

By Vida Bračko

The Slovenian professional group of nurses and health technicians in emergency units works as a professional organization within the Nurses and Midwives Association of Slovenia. Nurses and Midwives Association of Slovenia is a national professional association of nurses, midwives and health technicians in Slovenia. This year it celebrates the 95th anniversary of the establishment of the first professional organization - the predecessor of today's association.

There are 11 regional professional associations and 31 specialized professional groups in the organization. Each group addresses issues from its narrow professional field, organizes trainings, formulates recommendations and guidelines, and deals with professional and social problems relevant to the development of its field.

The Slovenian professional group of nurses and health technicians in emergency units was founded in 1995 on the initiative of some enthusiastic nurses from different regions of Slovenia, who recognized the importance and specialty of emergency nursing within the nursing profession. They also recognized the importance of cooperation and integration of all nurses working with emergency patients. At its very beginning the professional group wrote down the basic principles of action, which we still follow:

• promotion of emergency nursing;
• development of a professional identity of emergency nurses;
• preparation of professional standards and protocols for the emergency care

• preparation and implementation of continuous professional training in the field of emergency nursing;
• implementation of high quality professional and safe patient care;
• scientific research and publications;
• monitoring the innovations in the field of emergency care at home and abroad;
• cooperation with similar associations at home and abroad.

Emergency care covers a wide range of professional areas represented in our organization by different working groups: medical, surgical, triage group, group for critically ill patient, group of orthopaedic technologists etc.

Within the Nurses and Midwives Association our professional group cooperates with Ministry of Health and different educational institutions in shaping and directing health and education policies. Every year our organization prepares a two-day professional conference for all nurses that work with emergency patients from prehospital, emergency and hospital settings, where current and specific professional topics are discussed both theoretically and practically. The conference is attended by approximately 150 participants. All lectures are published in a book. Special areas of emergency care are usually presented within one-day professional meetings. In view of the constant development of the profession, medicine, health sciences and specific fields, our organization also carries out practical training workshops or courses. In Slovenia we are a licensed holder of Manchester triage system (MTS) and Advanced Trauma Care Nursing (ATCN) courses. Both courses are carried out twice a year for three days. We started with the MTS courses in 2011 and with the ATCN in 2016.

Health technicians - orthopaedic technicians participating in the organization do not have the appropriate specific training for the work they do. They therefore actively participated in the preparation of a national professional qualification for orthopaedic technologists. National professional qualification is the formally recognized qualification required for the pursuit of the profession or individual assignments within the profession at a certain level of complexity on the basis of a national professional standard. Our members have done this training for 10 years now.

One of the goals that remain unachieved is the acquisition of a specialization in emergency care.

www.eusen.org
The field of emergency nursing and nursing care for a critical patient requires practitioners who do not only have a high level of professional education. They need a wide range of clinical knowledge, commitment to teamwork, ability to prioritize and deal with quick patient changing conditions, offer holistic health care to patients and their relatives, different skills for which there are currently no appropriate programs. We have prepared a special educational program for the needs of additional special knowledge and skills, which could be obtained in the form of specialization in emergency care. Standardised competencies will ensure that all patients receive a quality and safe level of care.

The Slovenian professional group of nurses and health technicians in emergency units recognizes the importance of networking with related associations or different groups especially in terms of good team cooperation both at work and wider.

We have cooperated with the Slovenian Society for Emergency Medicine for 25 years now. Each year we organize together a 3-day international symposium on emergency medicine which is attended by 500 participants. We are also active internationally and are among the founding members of the EfCCNa, WFCCN and EuSEN, a member of MTG, ATCN Europe and cooperates with other similar associations regionally and wider.

Through its activities the organization tries to contribute to improving the quality, efficiency and safety of care of emergency patients. It promotes a healthy, safe and friendly working environment, and promotes a culture of nonviolent behaviour in the care and the quality of inter-professional collaboration in healthcare as well as for the promotion of the nurse's profession. With the organization of professional education and training, the members continually upgrade their knowledge and their practical skills.

A word or two about me, the new member of EuSEN board.

I have worked in emergency for more than 20 years now and I have always been interested in this specific area. Most of the time I worked as an emergency nurse, I did various tasks over the years, currently I work as a supervisory nurse and coordinator of the quality management system.

I have collaborated with the Slovenian professional group of nurses and health technicians in emergency units since its beginnings and am currently in the second mandate as president of the organization. As president I take active part with the basic organisation in various activities. I am an instructor for the course of MTS, lecturer in seminars and congresses etc.

I can say that my professional and interest fields are very much interwoven and that the emergency care present an ever new challenge to me.

I am looking forwards to working with and for European Emergency Nurses in the frame of EuSEN.
ED Quality Improvement Professional Certification Course
10-12 April 2019 - Florence Italy

The Emergency Department Quality Improvement Professional (EQuIP) Certification Course is a 21-hour (3-day) intensive professional development course, with optional certification exam, for emergency medicine clinicians delivered by the Department of Emergency Medicine at Harvard Medical Faculty Physicians at Beth Israel Deaconess Medical Center.

The course is being run through The Institute for ED Clinical Quality Improvement, in collaboration with the department of emergency medicine (at Beth Israel Deaconess Medical Center in Boston, MA, USA). It is a 3-day clinical quality course with optional certification. We hope that this course will be the start of an important international discussion and collaboration on ED clinical quality with our colleagues from around the world. The course website and program can be found here:

https://www.edqualityinstitute.org/
https://www.edqualityinstitute.org/course-program/

Discount for EUSEN Members
EUSEN members receive a 10% discount.
Enter the discount code “EUSEN” during registration.

Key Course Features
Course participants will learn from world-renowned experts in emergency medicine. The course, facilitated by faculty from Harvard Medical School and Beth Israel Deaconess Medical Center, will use case studies, presentations, and interactive hands-on workshops to answer the following questions:

• How can we assure clinical quality in our ED?
• How can we provide state of the art emergency medicine care for our patients, particularly in the areas of sepsis, STEMI, and stroke emergencies?
• Why is having an effective quality assurance program essential for all practicing emergency physicians?
• What are the basic principles of effective ED quality metrics?
• What is an error and an adverse event and how do we appropriately implement the AHRQ severity scale in assessment of these?
• What is the role of the provider in error assessment?
• How can Morbidity & Mortality conferences contribute to a well-functioning QI system?
• How do we perform a standard case assessment and use this to improve clinical quality?
• How can lean and Six Sigma practices help ED physicians treat their patients more safely?
• How do we perform team training to maximize clinical care?
• How do we use a triggers system to improve quality by reducing time-to-interventions?
• How do we implement standardized clinical pathways and assess their impact on quality of care and reduce variability?
Emergency department crowding is an international problem and a major patient safety concern. There is a widespread acceptance that ED crowding is a highly important issue: it compromises quality of care and patient satisfaction and it drives up health care costs and wait times.

But ‘how’ crowded is ‘too’ crowded? Unfortunately, there is little consensus on how to best measure crowding. Several crowding measures have been developed internationally, but the calculation of crowding is often labor-intensive and studies assessing the usefulness of these measures show conflicting results.

Therefore, the authors assessed the usefulness of crowding measurement in two EDs with different profiles: one high-volume ED and one low-volume ED in the Netherlands. By using a slightly modified version of the NEDOCS, real-time fully automated crowding measurement was feasible.

Although the comparison between the categorized crowding scores resulted in low weighted Kappa scores, which indicates a lack of agreement, there was a positive correlation between the uncategorized modified NEDOCS and ED staffs’ perception of ED crowding.

Thus, the uncategorized modified NEDOCS is valid in both the low volume and high volume ED in this study. This gives great opportunity for future research into the effect of interventions to reduce crowding and for using the modified NEDOCS for an equal spread of ambulance patients. However, it is very important to determine a cut-off level at which a specific ED can be identified as crowded, because the predefined NEDOCS categories are not optimal for all EDs.

The article ‘A different crowd, a different crowding level? The predefined thresholds of crowding scales may not be optimal for all emergency departments’ was published in the International Emergency Nursing in 2018.

3RD GLOBAL CONFERENCE ON
EMERGENCY NURSING & TRAUMA CARE

4 - 6 October 2018 | Noordwijkerhout, The Netherlands

What previous delegates have said:
“Excellent organised conference and was full of energy from all concerned.”
“Very informative with good mix of academics, researchers and clinicians”

Join international delegates to share the latest research, knowledge, innovations and practice developments within emergency nursing, trauma care, paramedical and medical sciences, and healthcare in both the developed and developing world.

Keynote speakers include:
- Margie Peden, Oxford University, UK; Johns Hopkins University, USA
- Teri Reynolds, Emergency, Trauma and Acute Care Lead, WHO, Switzerland
- Mary Watkins, Baroness Watkins of Tatvistock and Visiting Professor King’s College London, UK

Abstracts are invited for oral and poster presentation by 9 March 2018 on the following key topics:
- Emergency care in different environments
- Specialties in emergency nursing
- Pre-hospital care
- Advanced practice
- Research and education
- Patient safety and non-technical skills

Conference chairs
Robert Crouch OBE, University of Southampton and Hampshire and Isle of Wight Air Ambulance, UK
Mary Dawood, Imperial College Healthcare Trust, UK
Gerry Lee, Kings College London, UK
Petra Brysiewicz, University of KwaZulu-Natal, South Africa

Are you interested in Emergency Nursing?
Then join the European Society for Emergency Nursing NOW!

The society’s aim is to promote nursing activities in the field of emergency care.

The Society’s purpose is:
• to promote science and art of nursing in emergency care
• to promote contacts, exchange and cooperation between European emergency nursing associations
• to represent emergency nurses within and outside of Europe
• to draft and promote standards for training, implementation of the profession and management in the field of emergency nursing
• to harmonize the training of emergency nursing across Europe
• to promote cooperation with all healthcare professionals, institutions and organizations with a professional interest in emergency care
• to promote basic knowledge about emergencies throughout the population.

EuSEN is a NON-Profit association. To be a member with EuSEN you need to be a member of a local or national emergency nurse association. The association needs to have local standards and official statutes.

Do you want to learn more about the EuSEN Please contact:

The President of EuSEN
Door Lauwaert
Post address: UZ Brussel, Emerg. Dpt, Laarbeeklaan 101, 1090 Brussels, Belgium
Or door.lauwaert@uzbrussel.be

To join us - Fill in the admission form on the next page.

Dear future member,

If you want to support us developing EuSEN, you can become an individual EuSEN Member.

Membership fee for individual member had been fixed to 15€/year by the EuSEN Board. This money help us to promote the association throughout Europe.

As an Individual Member, you'll be informed of any evenemential action of EuSEN and every publication, you'll also have member price for Congress supported by EuSEN and any promotional action held by EuSEN.

Individual Membership don't give the right to vote at the General Meeting Assembly (Only for the Association) and membership of EuSEN don't mean that you are member of all the European nurses associations.

WE NEED YOU, if you want to help us by becoming a individual member, fill the form (see website EuSEN) and the treasurer will contact you as soon as possible to give you information about the procedure to pay the annual fee.

• NEW !!! To avoid high transaction fee, you can now pay by PayPal
Board:

President: Door Lauwaert (B)

Vice-President: Petra Valk-Zwickl (CH)

Secretary: Ole-Petter Vinjevoll (N)

Treasurer: Yves Maule (B)

Other board members:
Frans de Voeght (NL)
Gudbjörg Palsdottir (ISL)
Vida Braco (SLO)
